

## An ideal education system

In 21st century almost always have touch with foreign, european movies and serials, I'm sure that not only me rather other pupils thought, "It would be good, to have us education system like this", Indeed the. It would be very nice and common change. "No matter what anybody tells you, words and ideas can change the world.", (Dead poets society), I want to make this quote example that, our fight about this topic and cognitive ideas can come our dream true.

For me an ideal education system pupils, students must give their abilities maximum's means of use. Definitely must be prospective and effective, they will have right to express opinion with others, too. As for foreign languages, in this time is possible to bypassed this page?! In an ideal education system pupil will choose language, on which want her lesson to be, because foreign languages have big role in teenagers' futures, in development, in achieving the goal, in holidays, too. "How many languages you know, of that number men you are", languages knowing performs big role in our lives. Nobody want to in their somebody will speak with other language, cause is important to learn languages. New generation mainly like English language, but why should we bypass the page beautiful France, Italian and Spanish languages?

European method of teaching is like liberty bird in sky, it goes wherever it wants and learning everything. "Only education was and is source of any kind happiness and kindness" (Akaki Tsereteli), indeed the. Today human is weak without education. In most cases pupils don't learn because of teachers wrong way to teaching, and students think that, to study is difficult. European method of teaching can change it. Teachers will join meetings for new lesson's plants and it will be pleased lesson's plants, it will be effective for both, teacher and pupil.

Education system must have exit for successful students, give perspectives to learn in other countries too learn more. In every child's life will be source of motivation, teacher, parent...It's the most important thing.

I think our education system is uninteresting too, there is not global competition and projects, it will help every pupil. Is not exchange programs too, they are important to be sociable, love foreign languages and wish to learn them better. In my opinion must be fun actions, interesting parties and travels in museums or at exhibitions, everything this help pupil to be smarter and sane.

I think, if we can justify it with arguments for this topic, we will pass the aim in finish. I am sure, through this project many teenager would say their thought in front of the audience.

Thus I draw a conclusion, that lesson's time with European education system will be more creative, interesting, will join many students and they will better learn subjects. Will be interpretation of thoughts, their presentation in front of the audience. Implementation of those activities, which we can't implementation in our education system. I have big hope with this project we will tell society about our wish, which can give us many kindness. Thanks for attention!
